

Colima

- “Containers on LiMa”
- Why? (vs. Docker Desktop)
 - lightweight
 - free for larger organisations

Getting started

1. ``brew install docker docker-compose docker-buildx``
2. ``brew install colima``
3. ``colima start``

Demo for macOS

- GitHub repo: [angelphanth/colima-demo](https://github.com/angelphanth/colima-demo)
- Requires homebrew
